CASE STUDY

Kings Park Hospital

About the Project

The extensive refurbishment project was to upgrade and modernise the Springbourne Ward at Kings Park Hospital, to create a comfortable and safe environment for patients and staff.

The project involved the following major tasks:

- Isolate Electrics
- Isolate Mechanical
- Remove Fixtures and Fittings:
- Remove Floor Coverings:
- Internal Fit-Out:
- Latex Floors and Lay New Vinyl Floor Throughout:
- Roof Repairs:
- Install Kitchenette Base & Wall Units:
- Installation of Worktops:
- 1st Fix Electrics:
- 1st Fixes Mechanical:
- Complete New Data Installation:
- 2nd Fix Electrics:
- 2nd Fix Mechanical - LST Rads:
- Install Shelf & Coat Hooks:
- Install Wall Cladding & Splashback:
- Prepare Walls:
- Decorations to Walls:
- Install Basin and Taps:
- Install New Toilets:
- Install Roller Blind:

We adopted a phased approach to the refurbishment, carefully coordinating with hospital management to plan disruptive activities during quieter periods and taking stringent measures to maintain a clean and safe working environment.
